PROFILE SUMMARY

Dilitha Sandamal Siribaddana

Third-year Data Science undergraduate at Sri Lanka Institute of Information Technology (GPA: 3.42) with interests in data analytics, machine learning, and artificial intelligence. Seeking an internship opportunity to gain industry experience, develop practical skills, and contribute to data-driven projects.

EDUCATION

Bachelor of Science in Information Technology (Specializing in Data Science) (2024 – present)

- Sri Lanka Institute of Information Technology (SLIIT), Malabe, Sri Lanka*

G.C.E. Advanced Level – Bandaranayake College, Gampaha 2023(2024)

- Physical Science Stream*

G.C.E. Ordinary Level – Bandaranayake College, Gampaha 2020(2021)
9A's

Technical Skills

- Data Analytics Tools and Libraries:** Python, R, Pandas, NumPy, SQL
- Databases and Data Management:** MySQL, SQL Server, MongoDB
- Programming Languages:** Java, JavaScript, Python
- Web Technologies:** HTML5, CSS3, Node.js, React.js, Spring Boot
- Version Control and Collaboration:** Git, GitHub

Soft Skills

- Ability to learn new technologies quickly and apply them effectively
- Experienced in managing academic and project deadlines efficiently
- Clear and confident communication skills, including reporting and presenting insights
- Strong teamwork and collaboration skills with the ability to work effectively in diverse teams

PROJECTS & EXPERIENCES

1. Tomato Leaf Disease Detection — AI-based plant disease detection system (Python, CNN, Machine Learning)

GitHub:

- Developed an AI-based Tomato Leaf Disease Detection system to identify tomato plant diseases from leaf images.
- Trained an image classification model using tomato leaf datasets to detect healthy and diseased leaves accurately.
- Applied image preprocessing techniques such as resizing, normalization, and dataset splitting for better model performance.
- Stack: Python, Machine Learning, CNN, TensorFlow/Keras, Image Processing.

2. Hotel Room and Services Management App — Mobile hotel management system (React Native, MongoDB, TypeScript, JavaScript)

GitHub: <https://github.com/SandamalSiribaddana/Hotel-Management-System>

- Developed a mobile application to manage hotel room bookings, customer details, and service requests efficiently.
- Implemented room management features to track available rooms, booked rooms, and customer reservations.
- Used MongoDB to store and manage customer, booking, room, and service-related data.
- **Stack:** React Native, MongoDB, TypeScript, JavaScript

3. AI Text Humanizer — Web-based AI text refinement platform (Next.js, TypeScript, Gemini API, Tailwind CSS)

GitHub: <https://github.com/SandamalSiribaddana/AI-Humanizer>

Live: <https://ai-humanizer-ten.vercel.app/>

- Built a modern web application to rewrite machine-generated text into human-like prose that successfully bypasses AI detectors.
- Supported custom writing styles including Academic, Business, and Professional writing modes via prompt engineering with the Gemini 2.5 Flash model.
- Developed custom text processing helpers to analyze word counts, character limits, and detect Sinhala language text.
- Stack: Next.js, React, TypeScript, Tailwind CSS, Google Gemini API

4. Developed a Heart Disease Prediction system using machine learning, trained and compared six models, and selected ANN as the best-performing model for accurate risk prediction.

5. Developed a Vehicle Park Management System using Java Servlets, HTML, and CSS to manage vehicle entry, exit, parking slots, and local parking records efficiently.

CERTIFICATIONS & Badges

Python for beginners– DP Education (2025)

Introduction to Data Science – Cisco academy (2026)

Preparing Data for Analysis with Microsoft Excel – Coursera (2026)

Harnessing the Power of Data with Power BI – Coursera (2026)

Extract, Transform and Load Data in Power BI – Coursera (2026)
